## About International Advantage®

We are International Advantage®, a management consulting firm founded in 1992 that supports leaders within global or culturally diverse work environments to navigate organizational change.

We are a group of experienced partners that work together on a project basis, so our clients can benefit from having the right person for their situation. Most of our partners know each other well and in many cases have worked closely together. We originate from different locals and countries around the world but share a common philosophy and approach, which ensures consistency and supports sustainable solutions for our clients.

Our skills lend themselves to projects that require organizational development consultants, leadership coaches, diversity specialists, strategists, keynote speakers and group facilitators. Our clients emanate from numerous industries, which enables us to bring new ideas and concepts to our clients – a stimulus for innovative thinking and a competitive advantage.

We work and facilitate in several languages and pride ourselves on our cross-cultural competency.
